

Route Point Index¹

Application:	256-17
Applicant:	Greyhound Canada Transportation ULC

How to Use This Index

1. Use the “Route Point” column to identify any route point in Greyhound’s PT Licence.
2. Use the last three columns to identify the minimum service changes that Greyhound proposes for that route point. *Note: Letters A through Y refer to specific routes in the Greyhound licence and Application Summary.*
3. Get more details about the changes proposed in Application 256-17 by reviewing the affected route details in Greyhound’s Application Summary (available via <http://www.ptboard.bc.ca/bus.htm>).

For example, refer to Abbotsford in the first column. The index shows that Application 256-17 proposes to reduce the minimum route frequency for Abbotsford on 5 routes. These are Routes A, C, E, N and P. To compare the current and proposed minimum service levels for Abbotsford, look up each of these routes in the Greyhound Application Summary (via <http://www.ptboard.bc.ca/bus.htm>).

Route Point	Regional District	Proposed Route Elimination	Proposed Route Point Elimination	Proposed MRF ² Reduction
12 Mile	Bulkley-Nechako	K		
70 Mile House	Thompson-Nicola			E
100 Mile House	Cariboo			E
Abbotsford	Fraser Valley			A C E N P
Agassiz	Fraser Valley		A C N P E	
Armstrong	North Okanagan			A B1
Arras	Peace River	J		
Avola Junction	Thompson -Nicola			N
Azouetta Lake	Fraser-Fort George	J		

¹ If a conflict exists between this Index and the Application Summary, the Application Summary prevails.

² MRF = minimum route frequency.
