Revised Standard Rules for Taxis – Effective July 16, 2014

The Board has revised its *Standard Rules for Taxi Cabs Rates* to clarify existing expectations and practices.

- The rules now state requirements for taximeters, including adjustments, testing and accuracy. Licensees are responsible for ensuring that taximeters are tested and accurate at all times.
- GST replaces HST references
- The rules allow drivers and companies to charge a fee of \$75 to passengers who soil or damage the interior of a vehicle with bodily fluids or solids. The previous rule permitted drivers to bill for the cost of clean-up or repair; however, no amount was specified. A specified amount lets everyone know the amount that may be charged.
