Passenger Transportation Board
MOVING FORWARD, TOGETHER

Data in communities under 10,000

In 2019, the Passenger Transportation Board determined specific monthly data that it requires licensees with passenger directed vehicle authorization or transportation network services authorization to provide to the Registrar. These include data such as trip fares, hail times, pick-up times and locations, and drop-off times and locations.

Under the implementation schedule of the data requirements regulation, the Board indicates that taxi and TNS data requirements were implemented on September 16, 2019, but "TNS and taxi services operating in small communities with population less than 10,000 as defined by Statistics Canada" have an implementation schedule to be determined ("TBD").

Accordingly, at present time, the businesses listed below are not required to submit data as they serve communities with fewer than 10,000 people. The Board will implement data requirements for these taxi businesses at a future date to be determined.

Trade name	Regional district	Municipality	Licence #
